Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Claim Rejection under 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-14,16 are rejected under 35 U.S.C. 102(b) as being anticipated by DeMil (US 4,797,151; 1/10/89). DeMil discloses a method of applying a composition comprising copper butyrylcollagenate, copper caprylylkeratine, and/or copper caprylylglycinate to crop (grapes) and crop leaves. DeMil teaches that his method increases the yield of the crop. See abstract, column 2 lines 8-60, column 3 line 3 - column 4. DeMil does not teach specifically that his composition will protect the crop from being destroyed by pests (animals, microorganisms, viruses). However, it is inherent that application of DeMil's composition to crop would protect crop from pests.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeMil as applied to claims 8-14,16 above, and further in view of DeMil on record. DeMil recites all that is in

claim 18 expect for the instant amount of ingredient. However, in the absence of unexpected results, one would have expected to determine the optimum amount of ingredient through routine experimentation. One would have been motivated to do this in order to develop an invention that would have been most effective in promoting crop yield.

Claim Objection / Allowable Subject Matter

Claims 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant invention comprising beet crop. Claim 17 and 19 are allowable. The prior art does not teach or suggest instant invention comprising zinc salt of butyric acid or potato crop.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton Pryor whose telephone number is (703) 308-4691. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.
